Professional Summary

Experienced Full Stack Web Developer with a strong foundation in front-end development. Over 5+ years of combined experience building and maintaining websites and web applications for a variety of clients, specializing in HTML, CSS, JavaScript, PHP, custom API, React and WordPress. Proven ability to work remotely with cross-functional teams and deliver high-quality projects on time and within scope. Strong problem-solving skills with a focus on improving online presence and user experience.

Skills:

- **Front-End Development:** HTML, CSS, JavaScript, React, Redux, Tailwind CSS, Bootstrap, GSAP
- **Back-End Development:** Node.js, PHP, Ruby on Rails, MySQL, API Development
- **Web Technologies:** WordPress, Firebase, Django
- **Version Control:** Git, GitHub
- **Other Tools:** Vercel, Lottie Files, BEM, Figma
- **Soft Skills:** Cross-functional collaboration, Agile methodologies, Remote team management

Technical Skills

- **Front-End Development:** HTML5, CSS3, JavaScript, JQuery, Responsive Web Design
- **Back-End Development:** PHP, MySQL, Web APIs, WordPress, Swift, Woo Commerce, Python, MySQL
- **Tools:** Git, Photoshop, Technical Support

Current work:

React

Apple Clone Site

React, Vite, TailWind CSS, Three.JS, GSAP

<https://apple-website-clone-ochre.vercel.app>

<https://github.com/wlopz/Apple-Website-Clone>

The project replicates the sleek and interactive design of Apple's official site, featuring smooth animations, responsive layouts, and a visually captivating 3D experience. It was a great learning curve and opportunity to blend cutting-edge tools for UI/UX design, resulting in a fast, polished, and highly dynamic web page.

Disney+ Clone Site

React, Redux, Firebase, Google SSO

<https://disney-plus-website-clone-two.vercel.app>

<https://github.com/wlopz/DisneyPlus-Website-Clone>

The project replicates the Disney+ interface, with smooth navigation and dynamic content fetching. Firebase handles user data and authentication, while Redux ensures efficient state management for a responsive user experience.

Flixster

React, GSAP, Lottie Files, BEM

<https://flixter-movie-app.vercel.app>

<https://github.com/wlopz/React-Movie-Project>

Flixster is a sleek movie browsing application built using React, enhanced with engaging animations from GSAP and Lottie Files, and styled with the BEM methodology for maintainable CSS. The site provides a smooth user experience, allowing users to explore popular movies, read synopsis and ratings.

Library Site

React, BEM

<https://react-library-project-iota.vercel.app/>

<https://github.com/wlopz/React-Library-Project>

Using the BEM methodology for CSS, the site features a clean and modular design, making it both visually appealing and easy to maintain. The intuitive user interface ensures a seamless browsing experience, while the React components and Vercel deployment contribute to its responsiveness and performance.

Work Experience

Web Developer

VaVa Virtual Assistant
September 2018 - Present

- Spearheaded the development and launch of 15+ customized websites for small and large-scale enterprises, resulting in a 20% increase in online engagement and improved UX.
- Engineered and integrated a custom API with WordPress, streamlining data flow between the HR platform and web infrastructure, reducing manual data transfer time by 30%.
